

Visualization for the manufacturing industry

Stop waiting to see your data

- Your data: how, when, where you want
- Making visual data available for the enterprise
- Modern software technology and robust components
- Simple to deploy & use by all users with extensibility to sophisticated role based behavior
- Game changing lightning speed

The KISTERS 3DViewStation is a viewing tool suitable not only for dynamic engineering collaboration but also for downstream users who benefit from visualization and understanding of 3D CAD data. With 3DViewStation you can view, analyze, and annotate engineering data for collaboration within your organization and throughout your business supply chain. Import / Export and view data from all major CAD vendors such as CATIA, NX, ProE/Creo.

**Please compare us.
This is what customers say:**

Name (Supplier)	total	loadtime		Performance (rotate, zoom)	Display quality	user friendliness	licensing	measurements	section	Exploded views	draft angle analysis	wall thickness
		grade	Filesize ca. 100MB - Loadtime in seconds	grade	grade	grade	1 - Floating 5 - seat only	grade	grade	grade	grade	grade
tool 1	3,2	2	65	4	2	3	1	3	3	4	4	4
tool 2	2,5	5	180	2	2	1	5	2	2	2	3	3
tool 3	3,1	3	58	3	3	4	1	4	4	5	2	2
3DViewStation KISTERS	1,58	1	36	1	1	1	1	1	1	1	1	1
tool 4	2,6	3	90	1	1	2	1	2	5	5	5	1

Key features:

- Very, very fast viewing, 64-bit: i.e. 5 GB Catia or 20.000 parts SolidEdge: 1 sec as 3DVS
- Modern Office UI
- For Desktop & Tablets
- True MultiCAD DMU
- Supports many 3D CAD as well as 2D file formats
- Support standards like STEP, JT and 3D-PDF
- View, navigate, measure, section, compare, wall thickness, draft angle, views management, explode, filter, BOM, markup, annotate...
- PMIs, MBD, MBE, GT&T, FT&A
- standard CAD assemblies and virtual products
- Rich APIs for integration, hyper-linking
- Fast & reliable importers and exporters

Use cases:

- 3D viewer for sales & marketing
- 3D viewer for Design reviews
- 3D viewer for change management
- 3D viewer for work preparation
- viewer for shopfloor
- Viewer for collaboration
- Model Based Definition
- stand alone viewer
- Integrated viewer
- PLM viewer
- Role based PLM viewer

Minimum system requirements:

Windows 7, SP1 or higher
1.3 GHz processor or higher
4 GB RAM
1 GB hard drive space
integrated 3D graphics card

Recommended system requirements:

Windows 7, SP1 or higher
1.8 GHz processor or higher
8 GB RAM
1 GB hard drive space
integrated or dedicated 3D graphics card
